

## Product Name: Touch Dimmer Switch

**Product description:** This product is a unique design for Class III insulation appliance based on human touch applications.

**Function description:** When the human touch the touch tablet, then release within 0.5S, the switch status changes (ON / OFF).

When the human touch the touch tablet over 0.5 S, the switch will turn to adjustment status (high - low - high).

## Specifications:

|                     |                          |
|---------------------|--------------------------|
| Working Voltage     | DC12V/24V                |
| Maximum Load        | DC12V/36W DC24V/72W      |
| Quiescent Current   | 0.3mA                    |
| Working Temperature | -20 — +45 <sup>0</sup> C |
| Adjustment Method   | Voltage Control          |

## Installation Instructions:

As shown
